

### **How to get expert advice and help in managing your orchard**

You may want to arrange a visit to your orchard by an expert who can provide advice and - if required - undertake work such as pruning and planting.

We list the following, and you will need to make your own arrangement direct with the contractor, including payment arrangements. (Just to be clear: Orchard Link is not a party to any arrangement that you make, and we do not imply any preference or recommendation. But we would welcome any feedback of your experience via our contact page, including information about any additional contractors or consultants undertaking this kind of work that we can add to our listing here).

#### **Adam Montague**

A native, ornamental and fruit tree specialist, Adam is RHS qualified with over 20 years' experience. He provides all aspects of planning, planting and orchard maintenance, trained fruit care and is happy to teach individuals and groups in pruning and management techniques. He also designs gardens and landscapes with Sally Piper BA(hons) Landscape Design, Leeds.
